Do you need a website?

Websites are perhaps the most overlooked vehicle of advertising for businesses. Every retailer needs one.

The point to be made here is that you should at the very least have a presence on the web so that customers, potential employees, business partners and perhaps even investors can quickly and easily find out more about your business and the products or services you have to offer.

Don't think for a moment that your customers aren't already online. Studies show that 85-90% of people have used a search engine in the last week. Chances are your competition has an online presence, Do you?
